

*The following is a modified example of a typical forensic exam request. You can use it for future reference.*

**Computer forensic examination of the listed computer(s) and any other computer related storage media (i.e. disks, zip disks, CD-ROMS, DVD's, memory cards, external storage devices, etc.), specifically pertaining to \_\_\_\_\_ and other related material (i.e. e-mail, e-mail attachments, IP addresses, sent and received drafts, documents, hash values, etc.).**

**The unallocated space will be searched for potentially relevant lost or hidden data and all data/files will be copied out to other media.**

**All procedures utilized by the examiner (Blue Line Forensics, LLC) are consistent with those recommended by the International Society of Forensic Computer Examiners**

**All recoverable deleted files will be restored or recovered and copied out to other forensically sterile media.**
